- Professional sales, service and installation of heating and hot water systems
- Energy-efficient systems from quality brands
- Swimming pool and outdoor heating systems
- Attractive financing options with low monthly payments*
- Service plan option
- Dependable automatic delivery
- Tune-ups to ensure your system runs at peak efficiency

*Additional terms and conditions apply. Please call for details.

All backed by around-the-clock service that you can rely on — in any weather

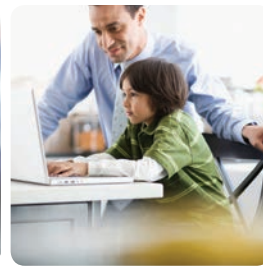

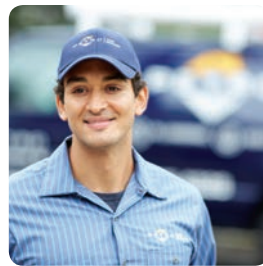

Courteous, knowledgeable customer service reps to take your call 24 hours a day, 365 days a year

Propane is one of the nation's most versatile sources of energy.

Count on Petro for all your propane needs.

Every day, people use propane to heat their homes, cook, fuel natural gas fireplaces and heat their swimming pools. In fact, 8.1 million households use propane gas to fuel many home comfort and utility services.¹

Propane offers homeowners reliability, cleanliness, improved performance and, on average, costs half as much per BTU as electricity. However you use propane in your home, the facts speak for themselves:

Propane gas furnaces¹

- Consistently supply air at 120 degrees Fahrenheit. Electric heat pumps dispense 95 degree air, which is less than body temperature (98.6 degrees), so the air feels cool, not warm.
- Last an average of 20 years, while electric heat pumps last an average of 12 years.
- Have lower repair costs than electric heat pumps.

Propane gas-burning cooktops and ovens¹

- Offer instant heat and absolute temperature control — 97% of professional chefs prefer cooking with gas.

Propane gas water heaters¹

- Cost approximately \$10 less per month to operate than comparable electric units.
- On average are 42% less expensive than electric heaters. Over an average life span, they can save homeowners nearly \$2,000 more than an electric unit.
- Heat more than twice as much water in an hour as comparable electric models.

Propane gas-burning fireplaces¹

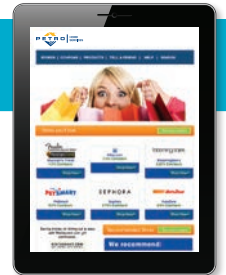

- Cost between 30% and 60% less per hour of operation than wood-burning fireplaces.
- Emit 40 times fewer emissions than wood-burning units. They can be turned off easily with a switch, eliminating concern about remaining embers.

Propane gas clothes dryers¹

- Can complete drying tasks in approximately three-quarters of the time it takes an electric unit.
- Some models save up to 65% in costs over electric dryers.

EXCLUSIVE CUSTOMER BENEFIT Petro Rewards

Shop your favorite merchants online and earn credits for Petro home services! Customers can earn up to 40% on purchases while shopping through the Petro Rewards website. Whatever percentage you earn, it's fully credited back to your Petro account.

*Credit cannot be redeemed in the form of a check and will only be applied directly to customer's account. Additional terms and conditions may apply.
